

The mission of the technology student association

By: Sabrina Bush

The core mission

Primary objective: TSA objectively focuses on enhancing personal development leadership and career opportunities in STEM.

Method: intercurricular activities

Action: Moving theory to practice

Key pillars of the mission

Personal development: students build confidence overcome shyness, and learn to express their ideas clearly through collaboration.

Leadership: members develop 21st century leadership skills through team building and community service projects.

Career preparation: TSA offers over 70 competitions that mirror real world STEM fields like architecture robotics and video game design.
